PACKING

MECH CODE 938

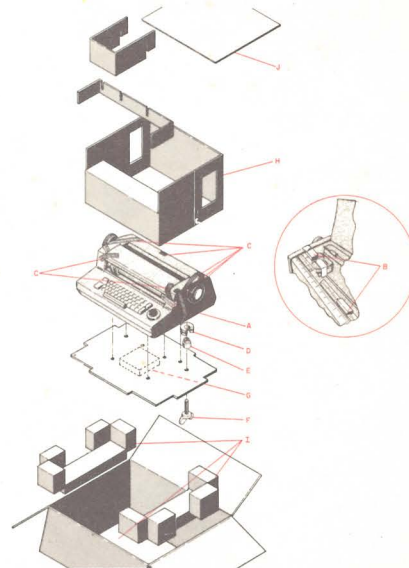

(50-B/M, PACKING PARTS)

If a set of "Selectric" Composer packing material is not available locally, request B/M 7340221 on an inter-office memo to:

Small Parts Shipping
Dept. 890
Austin Plant

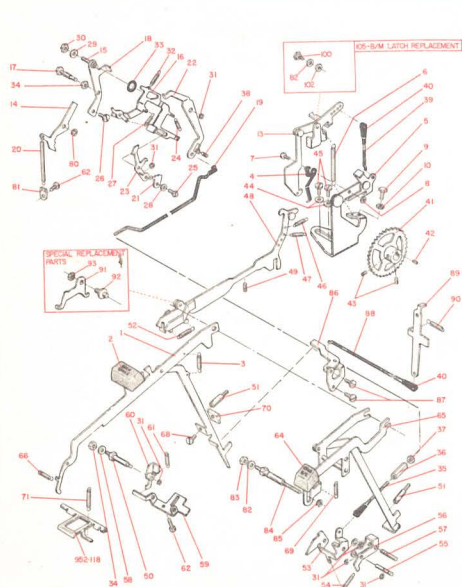

PACKING INSTRUCTION:

- A. Make sure indicator tube is at extreme right stop and tape in position.
- B. Place a piece of foam over the interlock scale and one over the ribbon feed plate (ribbon removed) and tape the carrier at the extreme left side of Composer (shoe latched out of leadscrew).
- C. Close top cover and tape.
- D. Place the seven (7) rubber spacers in bottom of cover with thick portion outside of covers.
- E. Place plastic inserts in the rubber spacers.
- F. Secure the pallet to the machine with all seven thumb screws, inserting through pallet, plastic inserts, rubber spacers and threading into power frame.
- G. Place foam pad on bottom of pallet.
- H. Place liner around machine.
- I. Place bottom liner and two foam pads in bottom of carton and place machine in carton.
- J. Place platen knobs, dust cover and coiled line cord in rear of machine; insert top liner and seal carton.
